INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 481507GXL/jmw	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416).	
International Application No.	International Filing Date (day/month/year)	te Priority Date (day/month/year)	
PCT/NZ2003/000064	10 April 2003	10 April 2002	
International Patent Classification (IPC) or	national classification an	nd IPC	
Int. Cl. ⁷ D06F 33/02, 37/00, 39/08; A47L 15/42; C02F 1/42; G01V 8/16			
Applicant FISHER & PAYKEL APPLIANCES LIMITED et al			
This international preliminary examination is transmitted to the applicant according	tion report has been prep g to Article 36.	pared by this International Preliminary Examining Authority and	
2. This REPORT consists of a total of 7 s	sheets, including this cov	ver sheet.	
This report is also accompanied amended and are the basis for the 70.16 and Section 607 of the Ad	is report and/or sheets co	ets of the description, claims and/or drawings which have been ontaining rectifications made before this Authority (see Rule under the PCT).	
These annexes consist of a total	of sheet(s).		
3. This report contains indications relating	g to the following items:		
I X Basis of the report			
II Priority	•		
Non-establishment of op	oinion with regard to nov	elty, inventive step and industrial applicability	
IV X Lack of unity of invention	on		
V X Reasoned statement und citations and explanation	er Article 35(2) with reg	ard to novelty, inventive step or industrial applicability;	
VI Certain documents cited	ı		
VII Certain defects in the in	ternational application		
VIII X Certain observations on	the international applica	tion	
Date of submission of the demand		Date of completion of the report	
26 September 2003		19 July 2004	
Name and mailing address of the IPEA/AU		Authorized Officer	
AUSTRALIAN PATENT OFFICE PO BOX 200, WODEN ACT 2606, AUSTRA E-mail address: pct@ipaustralia.gov.au Facsimile No. (02) 6285 3929		D.R. LUM Telephone No. (02) 6283 2544	

I	Basis of the	
1.		the elements of the international application:*
	X the intern	national application as originally filed.
	the descr	iption, pages, as originally filed,
	•	pages , filed with the demand,
		pages, received on with the letter of
	the claim	
		pages, as amended (together with any statement) under Article 19,
		pages , filed with the demand,
		pages, received on with the letter of
	the draw	
	_	pages , filed with the demand,
		pages, received on with the letter of
	the sequ	ence listing part of the description:
		pages , as originally filed
•		pages, filed with the demand
		pages, received on with the letter of
2.	which the inter These elements	the language, all the elements marked above were available or furnished to this Authority in the language in national application was filed, unless otherwise indicated under this item. It is were available or furnished to this Authority in the following language which is: large of a translation furnished for the purposes of international search (under Rule 23.1(b)).
	the lange	nage of publication of the international application (under Rule 48.3(b)).
	the languand/or 5	lage of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 5.3).
3.	preliminary	any nucleotide and/or amino acid sequence disclosed in the international application, the international examination was carried out on the basis of the sequence listing: d in the international application in written form.
		ether with the international application in computer readable form.
		d subsequently to this Authority in written form.
		d subsequently to this Authority in computer readable form.
	The state	ement that the subsequently furnished written sequence listing does not go beyond the disclosure in the onal application as filed has been furnished.
	The state	ement that the information recorded in computer readable form is identical to the written sequence listing has nished
4.	The ame	endments have resulted in the cancellation of:
		the description, pages
	. 🗖	the claims, Nos.
		the drawings, sheets/fig.
5.	This rep	ort has been established as if (some of) the amendments had not been made, since they have been considered to nd the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**
*	Replacement	sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this iginally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).
**	Any replacen	nent sheet containing such amendments must be referred to under item 1 and annexed to this report

	PCT/NZ2003/000064
IV. Lack of unity of invention	
1. In response to the invitation to restrict or pay additional fees the applicant has:	
restricted the claims.	
X paid additional fees.	
paid additional fees under protest.	
neither restricted nor paid additional fees.	
2. This Authority found that the requirement of unity of invention is not complied wit not to invite the applicant to restrict or pay additional fees.	th and chose, according to Rule 68.1,
3. This Authority considers that the requirement of unity of invention in accordance with Ru	ıles 13.1, 13.2 and 13.3 is
complied with.	•
X not complied with for the following reasons:	
	•
See supplement sheet	
Consequently, the following parts of the international application were the subject of intern establishing this report:	ational preliminary examination in
X all parts.	
the parts relating to claims Nos.	

V.	٠	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations
		and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	2-5, 8, 9, 12-19, 26-36, 38	YES
		Claims	1, 6, 7, 10, 11, 20-25, 37, 39-42	NO
	Inventive step (IS)	Claims	·	YES
		Claims	1-42	NO
	Industrial applicability (IA)	Claims	1-42	YES
	·	Claims		NO

2. Citations and explanations (Rule 70.7)

NOVELTY Claims 1, 6, 7, 10, 11, 20-25, 37, 39-42

- D1 EP 741991 B1 (WRAP S.p.A.) Claims1, 20-25
- D2 EP 517205 B1 (AWECO KUNSTSTOFFTECHNIK GERAETEBAU GmbH & CO KG) Claims 1, 7, 10, 20-25
- D3 DE 3209501 A (BOSCH-SIEMENS HAUSGERATE GmbH) -Claims 1, 7, 10
- D4 DE 3544580 C1 (BOSCH-SIEMENS HAUSGERATE GmbH) -- Claims 1, 6
- D5 FR 2580165 A (BOSCH-SIEMENS HAUSGERATE GmbH) Claims 1,
- D6 DE 2851541 A (LICENTIA PATENT-VERWALTUNGS GmbH) Claims 1, 11, 20-25
- D7 DE 4135820 A1 (BOSCH-SIEMENS HAUSGERATE GmbH) Claims 1, 10, 11, 20-25
- D8 EP 919178 A2 (T & P S.p.A.) Claims 37, 39
- D9 FR 2615617 A1 (ESSWEIN SA) Claims 37, 39
- D10 DE 2911366 A1 (LICENTIA PATENT-VERWALTUNGS GmbH) Claims 37, 39

For example, D1 discloses ion exchangers for dishwashers in which brine is pumped through the resin container to regenerate brine in accordance with a duty cycle selected which is set by the user and controlled by a microcomputer See paragraphs to - re paragraphs 29-37

Float system G is used to control the water level and the salt absence indicator in the brine tank - re paragraph 79.

D2 also discloses a programmable supply of brine into the resin container for regeneration depending on the cycle, see claim 1

D2 discloses overflow weirs 10 and air breaks 6

Salt absence indicators using light sources are disclosed in D8 - D10, for example, D8 describes optical sensors 8, 8' and 9, 9' which are directed into the brine tank and which functions as checking devices to monitor the level of resin's height inside the container.

INVENTIVE STEP (IS) Claims 1-42

- D11 EP 855164 A1 (ESSWEIN)
- D12 WO 01/26532 A1 (FISHER & PAYKEL LIMITED)
- D13 FR2825176 A1 (CLOVIS)
- D14 JP 09005021 A1(MITSUBISHI CABLE IND LTD)

Claims 1, 6, 7, 10, 11, 20-25, 37, 39-42 - as above.

Claims 2-5, 8-9, 12-19, 26-36, 38

Continued on Supplement page

VIII. Certain observations on the international application

The sup	e following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully ported by the description, are made:
1.	At Page 6, there does not appear to be any continuity between lines 5 and 6.
•	
•	

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of Box V

None of the above documents individually disclose all the features in these claims, however, when combined with the disclosure in other documents discloses the claimed invention. Because the citations are all from the same art, it is considered obvious to a skilled addressee to combine the disclosures.

For example:

- with respect of the added feature of incorporating a salt absence indicator using a light source to a water softener having a programmable duty cycle injection of brine for ion regeneration is considered not to involve any inventive step as it involves no ingenuity and will be obvious to a skilled addressee. (re claims 11, 16, 26-31 etc). This feature is disclosed in D8, D9, D10 D13, D14
- Also, the mounting of the water softener which include the features of independent claims 1, 20 or 33 in hollow walls of the washing appliances is also not considered to involve an inventive step. This feature is described in D4, D5.
- D3 discloses the feature of an overflow weir for the maintenance of the water level in the brine tank and including this to the documents which include the features of the independent claims is considered to lack an inventive step.
- Claims 18 and 33 define wash chambers which are slidably mounted in a cavity and which have top closures. These types of washers are disclosed in D12 and combining the disclosures of D4 and D5 with D12 is considered to be obvious to a person skilled in the art and hence lacks an inventive step.

Although none of the art cited in the International Search Report shows the usage of a two-way solenoid valve as a flow-directing valve from a single supply source, this is considered to be common general knowledge and hence lacks an inventive step. This is applicable to at least claims 2 -4, 21 - 23.

The features added by the remainder of the claims, such as, coupling an overflow weir spillage directly to an appliance drain or sump (claims 8, 9), energising or the delay in energising of the indicator light when the absence of salt is detected (claims 14, 15, 17, 29, 30, 31, 32, 38) and dispensing the softened water through the soap dispenser (claims 5, 34) are also considered to be common general knowledge and is obvious to a skilled addressee.

As a consequence, the invention as defined in claims 1-42 lacks an inventive step

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of Box IV

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Preliminary Examination Authority has found that there are different inventions as follows:

- 1. Claims 1-10 are directed to a washing appliance and claims 20-25 are directed to a water softener, respectively, with the regeneration of the resins in accordance with a duty cycle selected in accordance with the supply water hardness comprising the first "special technical feature";
- 2. Claims 11-19 are directed to a washing appliance, claims 26-32 to a water softener, and claims 37-38, & 39 are directed to a salt absence indicator, with the salt absence indicator comprising the second "special technical feature"; and,
- 3. Claims 33-36 a washing appliance comprising a water supply system as defined in claim 33, with the features of claim 33 comprising the third "special technical feature".

Since the abovementioned groups of claims do not share any of the technical features identified, a "technical relationship" between the inventions, as defined in PCT rule 13.2 does not exist.

It is noted that claims 1-19 & 20-32 include a common concept of the regeneration of the resins in accordance with a duty cycle selected in accordance with the supply water hardness as defined in claim 1 and/or 20. However this feature is not novel in the light of many documents of which the following is a selection:

- 1. DE 19960307 (BSH BOSCH &SIEMENS HAUSGERAETE GMBH)
- 2. DT 2851541 (LICENTIA PATENT GMBH)
- 3. EP 517205 (AWECO KUNST GERAETEBAU GMBH & CO KG)
- 4. EP 741991 (WRAP S.p.A)

Accordingly this common feature cannot constitute a special technical feature as defined in PCT Rule 13.2 since it does not make a contribution over the prior art listed above.

Claims 11 and 26 introduce the additional feature of the salt absence indicator. This is considered to constitute, prima facie, a "special technical feature" distinguishing the invention of these claims from that in claims 1 and 20.

Thus, the international application does not relate to one invention or to a single inventive concept, a posteriori.
